

SNIPER NGFW 730

Product Overview

SNIPER NGFW is an intelligent next-generation firewall that accurately controls various network potential threats with user and application identification technologies and tracks issues with continuous monitoring of traffic to effectively respond to internal network threats.

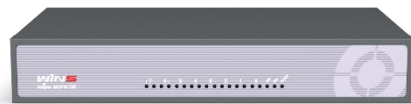

WintechNet's proprietary network security engine delivers high work productivity by delivering high efficiency (availability/scalability/reliability) and significantly improving system stability and administrator convenience.

Key Feature

- Application Layer Service Control with Application Security
- User-specific application usage and traffic flow control
- Provides policy establishment and management plan through statistical analysis of cumulative information
- Control traffic identification analysis for network security threats
- Traffic Monitoring/Tracking Response Management
- Traffic Abnormalities Analysis Features
- Traffic flow tracking based on correlation analysis
- Session/policy-based traffic tracking management
- Block simultaneous access to external networks when accessing a specific protected area based on the address of the origin
- Ensuring confidentiality and integrity of traffic between gateways with IPSec VPNs
- Provides encryption services for secure data communication between users and gateways over SSL VPN
- The system shall provide a packet filtering policy configuration Functions.
- The system shall provide a Functions to check for duplicated policies.
- The system shall provide various NAT Functions.
- The system shall provide a Functions to identify application usage and control traffic flow by user.
- The system shall provide a Functions to analyze and block threat traffic through an anomaly/signature-based detection engine.
- The system shall support Bridge mode operation without any change in network configuration.
- The system shall support various routing Functions.
- The system shall provide management tools based on SSH and web (HTTPS).

Hardware Specification

Components		SNIPER NGFW 730
CPU		4Core 2.4GHz
RAM		8GB
Storage		SSD 64GB
NIC	Slot	-
	1G Copper	8
	1G Fiber	-
	10G Fiber	-
Max. Throughput (FW)		8Gbps
Max. Throughput (VPN)		3Gbps
Size		1U
Power		single (adapter)

▲ SNIPER NGFW 730 Front

▲ SNIPER NGFW 730 Back
